LUCAS MARTINS

BACK-END DEVELOPER / SOFTWARE ENGINEER

(15) 98178-2217 I lucasmartinsti@outlook.com
Linkedin.com I Github.com

Computer Engineering student in my final year with a solid foundation in software development and systems architecture. I am proficient in languages such as C++, Python, C#, and JavaScript, and have practical experience with cloud infrastructure (AWS). I have strong experience working with relational databases (SQL/Firebird, SQLite) and developing scripts to automate processes and internal tools. I am seeking opportunities as a Back-End Developer to apply my analytical and problem-solving skills to the creation of scalable and efficient systems.

EDUCATION

Computer Engineering - FACENS

Feb. 2022 – Present

Full-scholarship student awarded first place in the Facens Code programming competition for developing an educational gamified application about sustainability.

PROJECTS

Cloud Infrastructure and Automation (AWS)

Implementation and documentation of cloud architectures using AWS EC2, AWS Lambda, CloudFormation, and Step Functions.

GastoJá Desktop (Financial Management)

Development of a desktop application focused on business logic and data persistence, using Python, SQLite, and integrated libraries for the interface (CustomTkinter) and data analysis (Matplotlib).

Systems Architecture (UmbraCore)

Development of a rendering engine built from scratch in C++. Focused on low-level programming, memory management, performance optimization, and complex object-oriented programming.

Extension Development (Picsreen)

Creation of a browser extension using web technologies, focused on extracting and processing visual data.

EXPERIENCE

DP Automação
Apr 2025 - Present

- Web Development, rebuilding and maintaining the corporate website, fixing systemic bugs and implementing improvements.
- Infrastructure Automation, creating PowerShell scripts to automate TCP/UDP port release in the Firewall and configure service exclusions in Windows Defender.
- Database Administration, handling and performing complex queries on clients' Firebird SQL relational databases using the IBExpert IDE.
- Level 3 Support, managing the lifecycle of complex technical tickets, creating technical documentation, and standardizing operational processes.

Deeliv
Mar 2023 - Mar 2025

- Internal Tool Development, developing a JavaScript tool for the support team, enabling easier manipulation of colors and images directly on clients' websites, significantly reducing ticket resolution time.
- Customer Success, conducting onboarding, technical employee training, and customer base monitoring, using data analysis for retention strategies.

SKILLS

- Programming & Back-end: C++, C#, Java, JavaScript, SQL.
- Web Development & Front-end: HTML/CSS, Angular, React, Tailwind CSS, Vite.
- Databases: SQL Server, MongoDB, Firebird.
- Game Development & Computer Graphics: Unity (UI Toolkit, Shader Graph, Multiplayer), Augmented Reality (AR Foundation/Core), OpenGL, Low-level Game Engine Architecture.
- Engineering & Automation: Software Architecture, Infrastructure Automation, Graphics Rendering Pipeline, Bug Fixing and Advanced Troubleshooting.
- 3D Design: Blender Sculpting and Low Poly, Pixel Art.
